3J is an extremely user friendly shop and team, we love to be creative and do custom work.

We will work from design through production stages and have the ability to receive and produce from several types of media, ranging from paper napkin drawings through Catia and Solid Works renderings. We can create customized quality plans for those demanding more than our existing certifications. We have flexible payment terms and cost amortization if needed. Warehousing is available and we can offer Min/Max production with inventory management. We have a secure facility; friendly to our ITAR, DOD, and LE applications.

We have the ability to expand production and capacity, as well as offer next day services, weekend work, and 24 hour production.
